

# America Needs SMART Security

A Sensible, Multilateral, American Response to Terrorism

## A PETITION

As a citizen concerned about the current direction of U.S. national security policy, I **support** SMART Security to:

- w **Reduce the threat of terrorism** by strengthening international institutions and cooperative diplomacy;
- w **Address the root causes of terrorism** by increasing development aid to the poorest countries and supporting peace-building and conflict prevention in unstable regions of the world;
- w **Stop the spread of weapons of mass destruction** by renouncing the development of new nuclear weapons, strengthening international disarmament treaties, and accelerating efforts to secure “loose” nuclear material in the former Soviet Union;
- w **Change budget priorities** by eliminating spending on obsolete, unnecessary, and unproven weapons systems, and investing instead in local “emergency responders” (fire, police and public health departments), as well as in meeting urgent domestic needs for health care, jobs and education.
